## thread

#### **INTEGRATIONS**

We have two integration levels for Thread Retirement Plan Services: 180 and 360. With 180 Integration, we generate and send your contributions to your plan provider—routinely, securely, and automatically. 360 Integration includes that, but also tracks any changes you make on your carrier's website and imports them back onto our system.

Additional costs may apply, depending on your integration level. Learn more about all the retirement integrations we support.

Scroll to find the time card integrations we currently work with. Keep in mind time card integration does take some time to build out for full conversion. While we do integrate with these systems, there will be a discovery and validation period to ensure everything is working properly.
